RE: Phase I – Environmental Site Assessment Pleasant Valley School 380 Pleasant Valley Road South Groton, Connecticut Eagle Project No. 19-091.13T1

Dear Mr. Reiner:

Eagle Environmental, Inc. (Eagle) completed a Phase I Environmental Site Assessment for the Town of Groton, located at 380 Pleasant Valley Road South, Connecticut (the "Site"). The Phase I Environmental Site Assessment was performed in general accordance with American Testing and Materials (ASTM) Standard E1527-13 and meets EPA's All Appropriate Inquiry (AAI) standard.

Based on the results of the Phase I ESA, one Recognized Environmental Condition (REC) has been identified for the Site. A summary of findings and a description of the identified environmental concern are discussed in the enclosed report. Please contact us directly if you have any questions related to the report

Sincerely, Eagle Environmental, Inc.

Report Prepared By: Chanler Florian Environmental Consultant

EXECUTIVE SUMMARY

Eagle Environmental, Inc. (Eagle) conducted a Phase I Environmental Site Assessment (ESA) for the Town of Groton at 380 Pleasant Valley Road South in Groton, Connecticut (hereinafter referred to as "the Site"). This Phase I ESA was performed in accordance with the scope and limitations of American Society for Testing and Materials (ASTM) standards E1527-13 and meets EPA's All Appropriate Inquiry (AAI) standard. The Phase I ESA included an environmental databases search, review of local, state, and federal regulatory agency files, and a limited reconnaissance of the Site and vicinity for potential off-site contamination sources. No sampling or other intrusive activities were conducted as part of the Phase I ESA. Additionally, an evaluation for the presence of suspected asbestos-containing material (ACM), lead-based paint (LBP), poly-chlorinated biphenyls (PCB) containing building materials or radon gas was not included in the scope of work for the ESA.

The major findings of the Phase I ESA are as follows:

- The 16.74 acre Site consists of an approximately 30,968 square foot (SF) former elementary school, an approximately 9,464 SF wood frame building, a temporary classroom building, and an outbuilding housing an aboveground fuel oil storage tank. The wood frame structure is currently used for dry storage, but the school and temporary classroom building are currently unoccupied, except for intermittent use to support activities of the Town's robotics club. The Site building is served by municipal sewer and public water.
- A 5,000-gallon AST was observed inside the masonry outbuilding located behind the school. Some de minimus staining was noted on the top of the tank, no significant floor staining or other evidence of potential release to soil or groundwater was evident during the site visit.
- No evidence of a heating system for the wood-frame building on the northeastern portion of the Site was noted during the site visit. No evidence of UST, such as fill or vent pipes, were observed during the site visit.
- Several nearby and upgradient properties with listed hazardous waste generation were identified. Based on the Groton watershed map, these properties would not be expected to have impacted the Site.
- A hazardous waste manifest indicating shipment of 5,000 pounds of lead waste from the Site in October 1996 was discovered, indicating the potential for the Site to be subject to the Connecticut Transfer Act upon a qualifying ownership transfer. However, the manifest also indicates that the potential for the shipped material to be exempt.

Based on the completed Phase I ESA, one Recognized Environmental Conditions has been identified for the Site:

REC No. 1 Former Underground Storage Tanks

• Town file information indicates that two USTs were formerly present at the Site and were removed in 1991. No visual evidence of USTs was observed at the Site during the Phase I site inspection. However, no analytical data or closure documentation related to the reported UST removals was discovered during the Phase I investigation. The potential exists that soil and/or groundwater contamination related to the former USTs may be present at the Site.

1.0 INTRODUCTION

Eagle Environmental, Inc. (Eagle) was retained by the town of Groton to conduct a Phase I Environmental Site Assessment (ESA) of the residential property located at 380 Pleasant Valley Road South, Connecticut (hereinafter referred to as "the Site"). The Phase I ESA is being conducted to assess the potential presence of environmental concerns on the Site prior to Pepsi's acquisition of the property.

This Phase I ESA was conducted in conformance with the scope and limitations of American Society for Testing and Materials (ASTM) standard for the Phase I Environmental Site Assessment Process (ASTM E1527-13) which is compliant with EPA's All Appropriate Inquiry (AAI) rule (40 CFR §312). In addition, this Phase I ESA meets the requirements of the Site Characterization Guidance Document published by the Connecticut Department of Energy and Environmental Protection (DEEP).

1.1 Purpose

The purpose of the Phase I ESA was to:

- Identify recognized environmental conditions (RECs), defined by ASTM as a condition with the potential for a past, current, or future release of oil or hazardous material (OHM) at the Property.
- Identify historic RECs (HRECs); defined by ASTM as a past release of OHM that has achieved regulatory closure without required controls or conditions.
- Identify controlled RECs (CRECs); defined by ASTM as a past release of OHM that has achieved regulatory closure with required controls or conditions.
- Evaluate the potential for a release of OHM at the Property.

In addition, this Phase I ESA considers whether the Site may be an "Establishment" as defined under the Connecticut Property Transfer Law (the "Transfer Act"; Sections 22a-134 through 22a-134e of the Connecticut General Statutes, as amended).

1.2 Scope

The Phase I ESA includes the following tasks:

- Review of an environmental database search report for sites identified on various Federal and State regulatory databases including: National Priorities List (NPL); Comprehensive Environmental Response Compensation and Liability Act (CERCLA); Resource Conservation and Recovery Act (RCRA); emergency response notification sites; state spills; underground storage tanks; leaking underground storage tanks; etc.;
- Review of files and database listings at the Connecticut Department of Energy and Environmental Protection environmental file room in Hartford, Connecticut;
- Review of municipal files at the Tax Assessor's Office, Health Department, Town Clerk, Fire Marshal's Office, and Building Department;
- Site reconnaissance to observe readily apparent current conditions and uses;
- A reconnaissance of surrounding properties to identify potential off-site sources of contamination; and,

• Vapor encroachment screening based on information obtained via the environmental database report, local and/or state research and interview documentation.

In accordance with the approved scope of work, Eagle did not collect samples for suspect asbestos containing material (ACM), lead-based paint (LBP), or radon gas.

1.3 Significant Assumptions

Our opinion and conclusions are based on the information sources presented in this report, and a site reconnaissance of the Property. Eagle assumes that all available information obtained as part of this ESA including database records, interview information, and historic information is accurate and reliable.

1.4 Limitations and Exceptions

This report meets the general requirements for a Phase I ESA established by ASTM Standard E1527 13 with the following exceptions:

The opinions provided herein are based on the information described in this report. Future investigations or information that was not available to Eagle may result in modification of the findings of this report. In preparing this report, Eagle relied on file information provided by state and local officials and information and representations made available to Eagle at the time of the report. If such information is incomplete or inaccurate, Eagle is not responsible. Eagle's professional services for this project have been performed in a manner consistent with that degree of skill and care ordinarily exercised by members of our profession currently practicing in the same locality, performing similar services under similar conditions. Eagle makes no other representations and no warranties, express or implied.

1.5 Special Terms and Conditions

This Phase I ESA was performed with no Special Terms and Conditions.

1.6 User Reliance

This report was prepared for the use of the Town of Groton, the owner of the Site.

2.0 SITE DESCRIPTION

2.1 Site Ownership and Location

Site Owner:	Town of Groton
Site Occupant :	Town of Groton
Site Location:	380 Pleasant Valley Road South, Groton, Connecticut
County:	New London County
Parcel ID:	168906487644 E
Latitude/Longitude:	41.3763870 - 41° 22' 34.99''N 72.0771500 - 72° 4' 37.74''W
Size:	Approximately 16.74 acres

The 16.74 -acre Site and is located at 380 Pleasant Valley Road South, Groton, Connecticut. The location of the Site is depicted on a Locus Map and Topographic Map enclosed as SL-1 and SL-2, respectively.

2.2 Current Use of the Property

The Site formerly operated as an elementary school until closing in late June of 2017. The main building and an adjacent temporary classroom structure are currently vacant, aside from intermittent use of the cafetorium and adjoining areas of the main building to support activities of the Town's robotics club. A wood-frame structure at the northeastern corner of the Site is currently used for dry storage of Town supplies, equipment, and records.

2.3 Site Reconnaissance

The Property was inspected on October 3, 2019, by Robert Kovach, LEP and Chanler Florian of Eagle. They were accompanied by Susan Cullen, from the town of Groton during the inspection. A follow-up inspection was conducted on October 22, 2019 by Mr. Florian to inspect the interior of the masonry outbuilding housing the Site's fuel oil aboveground storage tank (AST). Pertinent Site characteristics are shown on the Site plan presented as *SP-1*.

The Elementary school was built in 1973 and is owned by the Town of Groton. The main Site building occupies an area of approximately 10,000 square feet (SF). A large wood-frame structure located at the northeastern corner of the Site was built in 1947. A temporary classroom structure has been located along the north side of the main building since 1996, and a masonry structure housing the Site's AST is located west of the main building. Various portions of the Site building are slab-on-grade or underlain by a crawl space or basement.

Photographs of the Site are included in Appendix A.

2.3.1 <u>Water Supply</u>

The Property is served by public water supplied by The Groton Water Department.

2.3.2 Wastewater Disposal

The Property has reportedly been served by the municipal sewer system since the time of its construction.

2.3.3 <u>Oil/Chemical Storage</u>

Some small (one gallon or less) containers of cleaning compounds were observed on Site, primarily in the kitchen and cafeteria.

2.3.3.1 Stains, Corrosion or Odors

Some de minimus staining was observed on the floor of the boiler room and on the top of the AST in the masonry outbuilding. No corrosion or odors were observed during the inspection.

2.3.3.2 Drains, Sumps or Pools of Liquid

Two sumps were observed in the boiler room. No drains or pools of liquid were observed.

2.4.4 On-Site Storage Tanks

2.4.4.1 Underground Tanks

No evidence of underground storage tanks was observed on the Site.

2.4.4.2 Aboveground Tanks

One 5,000-gallon aboveground storage tank (AST) was observed in the brick structure located behind the school. There was minor oil staining noted on the top of the tank but the tank did not appear to be damaged, and no staining was noted on the concrete/sand beneath the tank.

2.4.5 <u>Transformers/PCB-Containing Equipment</u>

No transformers were observed on the site

2.4.6 <u>Pits, Ponds, and Lagoons</u>

No pits or lagoons were observed on the Site.

2.4.7 Stained Soil or Pavement

No stained soil or pavement was observed.

2.4.8 Odors and Stressed Vegetation

A 6x4 linear foot patch of soil was observed in back of the school and lacked vegetation. No unusual odors were observed on the Site.

2.4.9 Solid Waste

No solid waste was observed on the Site.

2.5 Current Uses of Adjoining Properties

Eagle conducted an area reconnaissance by walking through the facility and observing the property on October 3, 2019. The property and surrounding areas are described below:

Northerly: Residential (Valley Pines Condominiums)

- **Easterly:** Cardinal Honda
- Southerly: Residential
- Westerly: Residential (Navy Lodge)

3.0 SITE AND AREA HISTORY

The Site and area history has been compiled from City Directories, Historical Topographic Maps, Aerial Photographs of the Site and municipal office records and interviews.

3.1 Sanborn Fire Insurance Maps

No fire insurance maps covering the target property were available.

3.2 Topographic Maps

Topographic maps were obtained via the EDR Topographic Map Library.

Pleasant Valley Road South is shown adjacent to the Site in all maps. From 1892 to 1921, the land was undeveloped and no structures are depicted on the Site. The 1941 through 1952 topographic maps depict some urbanization to the south of the Site, the Wood framed Building is shown on the Site in 1952. In 1958 some portions of the school are now seen. In 1970 the complete school is now seen along with the brick AST structure located in back of the school. In 1984 no change is seen from 1970 and the site reflects current conditions. No structures are seen on the 2012 topographical map.

3.3 Aerial Photographs

Aerial photographs were obtained via EDR through their Aerial Photo Decade Package sourced from various state and Federal collections.

Aerial photographs from 1934 to 1941 depict the Site as mostly undeveloped with agricultural fields to the west and a residence to the north of the Site, first seen in 1934. In 1959 general construction and building footings for the school are first seen to the south of the undeveloped Site. In 1970 the school building is finished, the parking lot is still unpaved. From 1974 to present day the Site reflects current conditions.

3.4 City Directories

City directories were obtained by Eagle via EDR Digital Archive. City directories reviewed were from 1964, 1968, 1972, 1977, 1992, 1995, 2000, 2005, 2010 and 2014 and obtained from the EDR Digital Archive and Price & Lee's City Directory.

Directories from 1977 list 380 Pleasant Valley Road South as Pleasant Valley School No 1 for the main school building and Pleasant Valley No 2 for the wood framed structure. In 1992 and 1995 380 Pleasant Valley Road South was not listed. From 2000 to 2014 380 Pleasant Valley Road South was listed as Groton Town Public School District.

3.5 Site History Summary

The Site was first developed in 1970's, the first building constructed on the Site was the wood framed structure (now used as storage space for classroom materials). The main school building was constructed shortly after the wood framed building. The school's heating system was reportedly supplied by two 5,000-gallon USTs that file information indicates were removed circa 1991. The main building's heating system is now supplied by one 5,000-gallon aboveground storage tank (AST). Site history documentation is provided in *Appendix A*.

4.0 Geology and Hydrology

4.1 Surficial Geology

According to the DEEP Surficial Materials Map of Connecticut (Stone 1992), the materials beneath the Site are mapped as sand and gravel. Sand and gravel layers generally range from 25 to 50 percent gravel particles and from 50 to 75 percent sand particles. Layers are well to poorly sorted; bedding may be distorted and faulted due to post-depositional collapse.

4.2 Bedrock Geology

The 1985 Bedrock Geological Map of Connecticut indicates that bedrock beneath the Property consists of Potter Hill Granite Gneiss; light-pink to gray, tan-weathering, fine- to medium-grained, well-foliated granitic gneiss.

4.3 **DEEP Groundwater Classification**

According to the DEEP Water Quality Classifications Map of Connecticut (2015), the Site is located in a GA groundwater classification area which presumes the groundwater is suitable for human consumption without treatment. Class GA designated uses existing or potential public supply of water suitable for drinking without treatment and base flow for hydraulically-connected surface water bodies.

4.4 **DEEP Surface Water Classification**

The nearest USGS-mapped surface water to the site is the Thames River located approximately 2,800 feet east of the Site. According to the DEEP Water Quality Classifications Map of Connecticut (2015), the DEEP has classified the surface water as Class SB designated uses are habitat for marine fish and aquatic life and wildlife; commercial shellfish harvesting; recreation; industrial water supply; and navigation.

5.0 **REGULATORY REVIEW**

5.1 Federal and State Environmental Databases

5.1.1 Introduction

Eagle retained Environmental Data Resource, Inc. (EDR) of Milford, Connecticut to perform an on-line radius search (based on AAI standards) of applicable State and Federal environmental databases. The EDR (*Appendix B*), dated September 19, 2019, reviewed the following databases for the area within the specified radius of the Site:

Information Source	Search Distance
Federal Files	
National Priorities List (NPL)	1 mile
USEPA NPL Delisted Sites	1 mile
Resource Conservation and Recovery Act (RCRA) CORRACTS list (RCRA Site Subject to Corrective Action)	1 mile
Tribal Lands (boundaries within which recognized tribes have primary governmental authority)	1 mile
Resource Conservation and Recovery Act (RCRA) Treatment, Storage or Disposal Facility (TSDF) List	0.5 mile
Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) List, including No Further Remedial Action Planned (NFRAP) sites	0.5 mile
Federal Institutional / Engineered Control List	0.5 mile
RCRA Generators List	0.25 mile
Emergency Response and Notification (ERNS) List	property only
State Files	
Hazardous Waste Site List (State sites equivalent to NPL)	1 mile
Hazardous Waste Site List (State sites equivalent to CERCLIS)	0.5 mile
Landfill and Solid Waste Site	0.5 mile
Leaking Underground Storage Tank (LUST) List	0.5 mile
State Voluntary Clean-up or Brownfield Sites	0.5 mile
Oil & Chemical Spills Database	0.5 mile
Registered Underground Storage Tank (UST) List	0.5 mile
State Institutional / Engineered Control List	0.5 mile
State Other (includes CT Property Transfer Program sites)	0.5 mile

Eagle reviewed the area topography as it relates to the Site and determined an inferred direction of groundwater flow through the Site and adjacent area to be easterly. Based on this inferred direction of groundwater flow, properties (within the search radii specified

above) located northwest and upgradient of the Site will be discussed as they relate to potential offsite sources of contamination. Eagle gathered information on Groton's drainage basins and determined the upgradient properties in question are not a part of the same drainage basin that includes the Site. The location of the Site is depicted on the Topographic Map enclosed as *SL-2*.

5.1.2 <u>Federal Regulatory Listings</u>

Neither the Site, nor upgradient properties within the specified search radii are listed on the aforementioned Federal Regulatory Database Listings.

5.1.3 DEEP Regulatory Listings

SITE

One DEEP hazardous waste manifest listing was noted for the Site. The manifest indicated that 5,000 pounds of lead waste was shipped on 10/04/96. A review of the manifest document available at DEEP indicated that the material was "to be recycled".

No underground storage tank listings were found for 380 Pleasant Valley Road South. However, information indicating a past UST history was identified at the town Fire Marshal's office.

NAVAL SUBMARINE 28 Highland Ave upgradient 0.020 miles south of the Site

• A hazardous waste manifest (ID CTP000025810) dating 9/20/01 for 75-lbs of 'Environmentally Haz. Substances, Solid' was reported.

A ROYAL FLASH 2 Nereus Ave upgradient 0.040 miles southwest of the Site

• A hazardous waste manifest (ID CTD002593887) dating 3/16/07 for 527-gallons of 'Gasoline (including Gasohol)" was reported.

DOLPHIN GARDEN 28 Highland Ave upgradient 0.020 miles south of the Site

• A hazardous waste manifest (ID CTP000025810) dating 9/20/01 for 0.2lbs of 'Mercury' was reported.

Eagle gathered information on Groton's drainage basins and determined the upgradient properties listed above are within a different drainage basin from the Site. Therefore, it is unlikely that potential releases to groundwater from these properties would impact the Site.

Eagle conducted a DEEP file review on October 2, 2019 to seek Site-related UST information, remediation files, manifest files, oil and chemical spill files, oil and chemical spill correspondences, solid waste, industrial surveys, polychlorinated biphenyls files, recent spill files and any additional documents deemed relevant to the scope of this Phase I ESA. The following documents were found for the Site. The only relevant information discovered was a copy of the 10/04/96 hazardous waste manifest for the Site, which indicated that the manifested material was "to be recycled".

5.2 Municipal File Review

Eagle conducted a Municipal Office review on October 3, 2019. Municipal offices researched as part of this Phase I ESA study include the Groton Tax Assessor's Office, Fire Marshal's Office, Building Department and Health Department. All municipal files are included in *Appendix D*.

5.2.1 <u>Tax Assessor</u>

The Groton Tax Assessor had the Site property card which provided information regarding the parcel size and building layout, size and construction previously described in *Section 2.0*. The Site owner is listed as Groton Town of Pleasant Valley.

5.2.2 Building Department

The Groton Building Department contained no relevant documents pertaining to the Site.

5.2.3 <u>Fire Marshal's Office</u>

Eagle interviewed the Groton Fire Marshal Robert Tompkins. Who indicated he was aware of previous underground storage tanks on the Site. The following documents were available for review:

• An undated UST notification form indicating that two tanks were removed and replaced with an AST in 1991.

5.2.4 <u>Health Department</u>

Eagle reviewed documents from the Ledge Light Health District. No relevant documents were observed or collected.

6.0 USER PROVIDED INFORMATION

A User Questionnaire was completed by Mr. Paige Bronk, Economic and Community Development Manager for the Town of Groton Connecticut. A summary of the information provided by Mr. Paige Bronk from the questionnaire is provided below. A copy of the questionnaire is provided in *Appendix E*.

Note that a complete title search, valuation, and other real estate information are beyond the scope of work of this Phase I ESA.

Historical information is provided in *Section 4.0*, *5.0* and *6.0* of this report. The information presented in this section was based primarily on the information collected from Mr. Paige Bronk.

6.1 Environmental Liens

The above-referenced individual indicated in the User Questionnaire that he is unaware of any environmental liens issued against the subject Site.

6.2 Environmental Land Use Restrictions

The above-referenced individual indicated in the User Questionnaire that he is unaware of any environmental land use restrictions that are in place at the Site or that have been filed/ recorded in public land records for the Site.

6.3 Specialized Knowledge

The above-referenced individual indicated in the User Questionnaire that he is unaware of specialized knowledge or experience relating to the subject Site.

6.4 Valuation Reduction for Environmental Issues

The above-referenced individual indicated in the User Questionnaire that he is unaware of any reduction in property value for the Site as a result of environmental issues.

6.5 Commonly Known or Reasonable Ascertainable Information

The above-referenced individual indicated in the User Questionnaire that he is unaware of additional known or reasonable ascertainable information pertaining to the subject Site that would assist in identification of RECs.

6.6 Degree of Obviousness of Contamination

The above-referenced individual indicated in the User Questionnaire he is unaware of any obvious indicators that point to the presence or likely presence of contamination on the property.

6.7 **Previous Reports**

No previous reports were known or obtained.

7.0 INTERVIEWS

7.1 User

The User is typically interviewed about their knowledge of the Site during the Phase I ESA study. The User of the report, Mr. Paige Bronk, referred Eagle to the User Questionnaire discussed in *Section 3.0* of this *report*.

7.2 Owner / Key Site Manager

Eagle identified the Key site manager as Mrs. Susan Cullen. Mrs. Susan Cullen represented the town of Groton Connecticut during the Site visit conducted on October 2, 2019. Mrs. Susan Cullen provided Eagle with access to the school building and provided keys to access secured areas of the building. Eagle was not able to access the locked masonry structure located along the rear of the building, where the Site AST was suspected to be located. Eagle personnel subsequently re-visited the Site on October 22, 2019, after a key to the outbuilding was located.

7.3 Interview with State and/or Local Officials

Eagle visited the Groton Fire Marshal on October 2, 2019 to gain information of potential UST and AST storage on Site. Eagle interviewed Mr. Robert Tomkins, Groton Fire Marshal and asked for information regarding on Site UST and AST storage. Mr. Robert Tomkins had limited information on the subject but provided the only known "UST facility notification form" pertaining to the Site. No closure report or analytical data related to the reported UST removals were found in the Fire Marshal's files.

8.0 DATA GAPS

The following data gaps were identified during the completion of the Phase I Site Assessment:

• Town records indicate that two USTs were removed from the Site in 1991, but no closure documentation for these tanks was found during the Phase I investigation.

The lack of available information regarding closure of the former Site USTs represents significant data gaps that precludes ruling out the potential for soil or groundwater impacts related to the former USTs to be present at the Site.

9.0 VAPOR ENCROACHMENT SCREENING

9.1 Vapor Encroachment Screening

In 2010, ASTM international issued its revised Standard E2600-10 entitled "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions." This standard guide has been adopted into the ASTM E1527-13 Phase I Environmental Site Assessment Standard. The purpose of the standard is to define good commercial and customary practice for real estate transactions in the United States for conducting a screening assessment directed solely at the likelihood for migrating vapors to encroach upon a target property (i.e. the Site) creating a vapor encroachment condition (VEC). The presence of vapors in a building that has migrated from a release to the environment (i.e. from a release outside of the building) can result in CERCLA liability. Thus, this screening serves to assess the likelihood of a VEC. Determining whether or not encroaching vapors result in a vapor intrusion problem requires further investigation that is beyond the scope of the standard.

A VEC is defined as the presence or likely presence of chemicals of concern (COC) vapors in the subsurface of the Site caused by the release of vapors from contaminated soil or groundwater on or near the Site. An area of concern (AOC) as defined in the E2600-10 is measured 0.33-miles from the Site for known or suspect contaminated sites with volatile organic compound (VOC) or semi-VOCs; 0.1-mile from the Site for known or suspect petroleum hydrocarbon releases. The identification of AOCs may be reduced if the groundwater flow direction is known relative to the Site. Critical distances are taken into account for contaminated groundwater plumes in any direction for COCs including petroleum light non-aqueous phase liquid (LNAPL) accumulating above the water table at a distance of 100 ft. from the edge of the plume to the Site and 30 ft. for dissolved volatile petroleum hydrocarbons.

A Vapor Encroachment Screen (VES) was obtained by Eagle via EDR. Based on this VEC assessment, and the Site reconnaissance, there is low to moderate potential that a VEC exists at the Site, since several nearby sources of underground petroleum were identified were identified in the vicinity. A copy of the VES report is provided in *Appendix A*.

10.0 CONNECTICUT TRANSFER ACT STATUS

The State of Connecticut Property Transfer Law (the "Transfer Act"), described in Sections 22a-134a through 22a-134e of the Connecticut General Statutes, requires the disclosure of environmental conditions when certain real properties and/or businesses are transferred. The law applies only to those properties that are deemed to be "establishments" as defined under the law. As defined by the Transfer Act, an establishment is:

... any real property at which or any business operation from which (A) on or after November 19, 1980, there was generated, except as the result of (i) remediation of polluted soil, groundwater or sediment, or (ii) the removal or abatement of building materials, more than one hundred kilograms of hazardous waste in any one month, (B) hazardous waste generated at a different location was recycled, reclaimed, reused, stored, handled, treated, transported or disposed of, (C) the process of dry cleaning was conducted on or after May 1, 1967, (D) furniture stripping was conducted on or after May 1, 1967, or (E) a vehicle body repair facility was located on or after May 1, 1967.

If the Site is determined to be an establishment, DEEP reporting and involvement may be required in order to transfer the property, and DEEP will require identification, delineation, and remediation of all environmental concerns in accordance with Connecticut's Remediation Standard Regulations.

A hazardous waste manifest showing shipment of 5,000 pounds of lead waste from the Site in October 1996 was discovered as part of the Phase I investigation. The volume of shipped material indicates the potential for the Site to be considered and "Establishment" subject to the Connecticut Property Transfer Law upon a qualifying ownership transfer. However, the manifest also indicates that the shipped material is "to be recycled". This comment suggests that the shipped material may have been spent batteries or universal waste that would be exempt from consideration as a qualifying hazardous waste shipment under the Transfer Act. Legal counsel should be consulted to make a definitive Transfer Act determination.

11.0 CONCLUSIONS AND RECOMMENDATIONS

Eagle Environmental prepared this Phase I ESA report in general conformance with the scope and limitations of ASTM Practice E 1527 13. Any exceptions to, or deletions from, this practice are described in Section 1.2 of this report.

Eagle has followed the guidelines described in ASTM E1527 13 to identify the RECs at this Site in a manner consistent with standard practice in the industry, as indicated in the ASTM standard, "No environmental site assessment can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with a property, and the practice recognizes reasonable limits of time and cost."

The major findings of the Phase I ESA are as follows:

- The 16.74 acre Site consists of an approximately 30,968 square foot (SF) former elementary school, an approximately 9,464 SF wood frame building, a temporary classroom building, and an outbuilding housing an aboveground fuel oil storage tank. The wood frame structure is currently used for dry storage, but the school and temporary classroom building are currently unoccupied, except for intermittent use to support activities of the Town's robotics club. The Site building is served by municipal sewer and public water.
- A 5,000-gallon AST was observed inside the masonry outbuilding located behind the school. Some de minimus staining was noted on the top of the tank, no significant floor staining or other evidence of potential release to soil or groundwater was evident during the site visit.
- No evidence of a heating system for the wood-frame building on the northeastern portion of the Site was noted during the site visit. No evidence of UST, such as fill or vent pipes, were observed during the site visit.
- Several nearby and upgradient properties with listed hazardous waste generation were identified. Based on the Groton watershed map, these properties would not be expected to have impacted the Site.
- A hazardous waste manifest indicating shipment of 5,000 pounds of lead waste from the Site in October 1996 was discovered, indicating the potential for the Site to be subject to the Connecticut Transfer Act upon a qualifying ownership transfer. However, the manifest also indicates that the potential for the shipped material to be exempt.

Based on the completed Phase I ESA, one Recognized Environmental Conditions has been identified for the Site:

REC No. 1 Former Underground Storage Tanks

• Town file information indicates that two USTs were formerly present at the Site and were removed in 1991. No visual evidence of USTs was observed at the Site during the Phase I site inspection. However, no analytical data or closure documentation related to the reported UST removals was discovered during the Phase I investigation. The potential exists that soil and/or groundwater contamination related to the former USTs may be present at the Site.

Eagle recommends that additional investigation be performed to document that the former Site USTs were properly closed and that residual petroleum impact to soil and groundwater related to the former USTs is not present. Additional research regarding the source of the 1996 hazardous waste shipment should also be performed to facilitate a definitive Transfer Act determination for the Site.

12.0 LIMITATIONS

This report and all associated work products provided in connection with the performance of this Phase I Site Assessment are subject to the following limitations.

The report was based on the observations of Eagle Environmental, Inc. (Eagle) of the Site condition and a review of information provided by the state and local officials and information and representations made by other parties and on information contained in the files of State and/or local agencies made available to Eagle at the time of the Site assessment. To the extent that such files are missing, incomplete or not provided, Eagle is not responsible. Although there may have been some degree of overlap in the information provided by these various sources, Eagle did not attempt to independently verify the accuracy or completeness of all information reviewed or received during the course of this Phase I ESA.

The purpose of this report is to assess the observable characteristics of the subject Site with respect to the presence of potential environmental contamination, such as potentially hazardous waste or petroleum and chemical products and wastes as defined in Connecticut General Statutes section 22a-452. No specific attempt was made to check the compliance of present or past owners or operators of the Sites with Federal, State or local laws and regulations, environmental or otherwise.

Eagle's work presented herein was performed in accordance with generally accepted practices of other consultants undertaking similar studies at the same time and in the same geographical area, and Eagle observed that degree of care and skill generally exercised by other consultants under similar circumstances and conditions. Eagle's findings and conclusions must be considered not as scientific certainties, but as a professional opinion concerning the significance of the limited data gathered during the course of the Program. Specifically, Eagle does not and cannot represent that the Sites contains no hazardous material, oil, or other latent condition beyond that observed by Eagle during preparation of this report.

14.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONAL

I declare that, to the best of my professional knowledge and belief, I meet the definition of an Environmental Professional as defined in "§312.10 of 40 CFR §312" and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in general conformance with the standards and practices set forth in 40 CFR Part 312.

Mr. Robert Kovach is a Licensed Environmental Professional (LEP) in Connecticut and has over 29 years of environmental experience conducting site assessments, field investigations, and remedial actions in Connecticut and has a Bachelor of Science degree in Quantitative Geology and a Master of Science degree in Management.

Robert R. Kovach, II, LEP, CPG Senior Manager, Environmental Sciences

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

09/19/19

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Eagle Environmental, Inc were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # AA30-4F36-8433

PO # 19-091.13T1

Project Groton, Town of

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results Certification #: AA30-4F36-8433

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Eagle Environmental, Inc were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

ENF Action Comment:	Suction piping without continuous monitoring with a check valve at the tank is required to be tightness tested every three years. Safe suction piping is required to be tested annually the last three (3) years of its life expectancy. The owner or operator failed to immediately respond to a sump sensor alarm. The owner or operator has failed to notify the Commissioner within thirty (30) days of changes in UST notification information. The owner or operator has failed to perform, or has performed inadequately, the requisite monthly visual inspections at their UST facility or facilities. The primary overfill device was not identified. The release detection for this tank indicates a possible release. The owner shall perform an investigation into the cause of the failure to determine if a release has occurred. If a release of a regulated substance from the system has occurred, the owner shall comply with all the requirements of Section 105. The UST system is in operation or is tempo

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental St Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Copyright 2019 by Environmental Data Resources, Inc. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, Inc., or its affiliates, is prohibited without prior written permission.

EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, Inc. or its affiliates. All other trademarks used herein are the property of their respective owners.

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed

data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/25/2019 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
DOD/USN SB/AREA A LA	US NAVAL SUBMARINE B	N 1/2 - 1 (0.629 mi.)	61	239
EPA ID:: CT4170022020				

Federal RCRA generators list

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 03/25/2019 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
LATHROP HONDA EPA ID:: CTR000005892	531 RTE 12	E 0 - 1/8 (0.071 mi.)	C14	53

State- and tribal - equivalent CERCLIS

CT SDADB: Site Discovery and Assessment Database.

A review of the CT SDADB list, as provided by EDR, and dated 04/23/2010 has revealed that there are 4 CT SDADB sites within approximately 0.5 miles of the target property.

State and tribal leaking storage tank lists

CT LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Environmental Protection's Leaking Underground Storage Tank List.

A review of the CT LUST list, as provided by EDR, and dated 05/03/2019 has revealed that there are 16 CT LUST sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

CT UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Protection's "Town Inventory" UST Listing.

A review of the CT UST list, as provided by EDR, and dated 04/16/2019 has revealed that there are 4 CT UST sites within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/25/2019 has revealed that

there are 4 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

CT CPCS: A list of Contaminated or Potentially Contaminated Sites within Connecticut. This list represents the "Hazardous Waste Facilities," as defined in Section 22a-134f of the Connecticut General Statutes (CGS). The list contains the following types of sites: Sites listed on the Inventory of Hazardous Waste Disposal Sites; Sites subject to the Property Transfer Act; Sites at which underground storage tanks are known to have leaked; Sites at which hazardous waste subject to the RCRA; Sites that are included in EPA's (CERCLIS); Sites that are the subject of an order issued by the Commissioner of DEP that requires investigation and remediation of a potential or known source of pollution; and Sites that have entered into one of the Department's Voluntary Remediation Programs.

A review of the CT CPCS list, as provided by EDR, and dated 03/05/2019 has revealed that there are 12 CT CPCS sites within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 4 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

		erest/Information System RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. Connecticut Site Information Management System (SIMS) is part of a suite of web-based applications designed to allow the Connecticut Department of Environmental Protection (DEP) staff to harmonize environmental interest information from disparate systems in a single agency-wide data repository (known as CFI). SIMS provides tools for identifying and resolving duplicate data, querying data (using both tabular and geospatial methods), and viewing/maintaining documents associated to the data.

ERIT GAS HESS STATION #07	504 (Continued) S1218225		
Lph Wells:	Not reported		
User Stamp:	Kelly McShea		
Date Stamp:	08/12/2004		
•			
Correspondence:	Action: GW Monitoring Report Issued:10/2/2002		
	Received:10/25/2002EnviroTrac: MW sampled 5/13/02. BTEX MAX: 105 ug/l		
	MW11, MTBE MAX: 1,200 ug/I MW11. Semi-annual sampling (May &		
	October)Depth to Water: 7.05-9.68 ftFlow Direction: North		
Environmental Impact:	Not reported		
FollowUp:	Not reported		
GW Comments:	A small stream & associated wetland is located east & to the rear of		
evv eenmente.	the site. A storm sewer line runs in a west-east direction		
	immediately north of the site & discharges to the stream approx. 100		
	yards to the northeast. The stream drains into Groton Reservoir		
	located 1 1/4 miles from the site. Depth to water on 11/22/02		
Location Desc:	6.87-9.58 ft.		
	The site is located in a commercial area. The overburden consists of		
	wetland silts and organics, graded fine to coarse sands and sandy		
	glacial till. The bedrock beneath the site consists of biotitic		
	quartzite and schist.		
NOV Comments:	Not reported		
Release Desc:	Not reported		
Running Comments:	UST Facility Notification ID: 59-887UST Cleanup Account ID: 587GA		
-	area. According to the UST Facility Notification Form dated 4/24/92,		
	3x8k gasoline and 1x550 gallon WO USTs were removed from the facility		
	in mid-April 1991. Removed tanks were installed in November of		
	•		
	1964. One piece of correspondence received from OCSRD files on 8/23/91		
	from Harwinton Drilling & Engineering Co. Inc. of Harwinton CT, is an		
	application for permit to discharge treated groundwater to sewer.

GW Comments:	Site is located in commercial area. A small stream & associated
	wetland is located east and to the rear of the site. A storm sewer
	line runs in a west-east direction immediately north of the site and
	discharges into a stream approx. 100 yards to the northeast. The
	stream drains into the Groton Reservoir located approx. 1 1/4 mil
	from the site.
Location Desc:	Soils consist of wetland silts and organics, graded fine to coase
	sands, and sandly glacial till. Underlying bedrock made of biotitic
	quartzite and schist.

AMERADA HESS STATION # 07504 (Continued)

Work Performed:

As a result of an increase in MTBE in MWs during Nov. 2003 sampling event, a tank tightness test was conducted on 1/15/04 by Crompco. Results indicated that four of the tank spill buckets required replacement. Spill #310 assigned. On 2/2/04 all spill buckets were replaced. As a result of MTBE concentrations identified in MWs an EFR event was conducted on 10/13/04. GW was extracted from MW5, MW11 & MW12 or approx. 2 hours at each well and a total of 405 gals. Of GW was recovered.

ODD FELLOWS HOME OF CONN DBA FAIRVIEW 185 STARR HILL RD GROTON, CT 06340 NOVUST-TM19-0004 Field Notice of Violation Not reported 03/25/2019 \$0.00 Not reported Materials Management & Compliance Assurance Underground Storage Tank Enforcement Active 03/25/2019 Not reported Not reported Wilde Philip Suction piping without continuous monitoring with a check valve at the tank is required to be tightness tested every three years. Safe suction piping is required to be tested annually the last three (3) vears of its life expectancy. The owner or operator failed to immediately respond to a sump sensor alarm. The owner or operator has failed to notify the Commissioner within thirty (30) days of changes in UST notification information. The owner or operator has failed to perform, or has performed inadequately, the requisite monthly visual inspections at their UST facility or facilities. The primary overfill device was not identified. The release detection for this tank indicates a possible release. The owner shall perform an investigation into the cause of the failure to determine if a release has occurred. If a release of a regulated substance from the system has occurred, the owner shall comply with all the requirements of Section 105. The UST system is in operation or is tempo ... 7 Not reported Not reported Underground Storage Tank Notification (59-921) Respondent ODD FELLOWS HOME OF CONNECTICUT, INC STARR HILL RD. To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 07/19/2019 Date Data Arrived at EDR: 07/30/2019 Date Made Active in Reports: 09/03/2019 Number of Days to Update: 35 Source: EPA Telephone: N/A Last EDR Contact: 09/05/2019 Next Scheduled EDR Contact: 10/14/2019 Data Release Frequency: Quarterly

NPL Site Boundaries

Sources:

EPA's Environmental Photographic Interpretation Center (EPIC) Telephone: 202-564-7333

EPA Region 1 Telephone 617-918-1143

EPA Region 7 Telephone: 913-551-7247

EPA Region 8 Telephone: 303-312-6774

EPA Region 9 Telephone: 415-947-4246

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/19/2019 Date Data Arrived at EDR: 07/30/2019 Date Made Active in Reports: 09/03/2019 Number of Days to Update: 35 Source: EPA Telephone: N/A Last EDR Contact: 09/05/2019 Next Scheduled EDR Contact: 10/14/2019 Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991 Date Data Arrived at EDR: 02/02/1994 Date Made Active in Reports: 03/30/1994 Number of Days to Update: 56 Source: EPA Telephone: 202-564-4267 Last EDR Contact: 08/15/2011 Next Scheduled EDR Contact: 11/28/2011 Data Release Frequency: No Update Planned

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 07/19/2019 Date Data Arrived at EDR: 07/30/2019 Date Made Active in Reports: 09/03/2019 Number of Days to Update: 35 Source: EPA Telephone: N/A Last EDR Contact: 09/05/2019 Next Scheduled EDR Contact: 10/14/2019 Data Release Frequency: Quarterly

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019 Date Data Arrived at EDR: 04/05/2019 Date Made Active in Reports: 05/14/2019 Number of Days to Update: 39 Source: Environmental Protection Agency Telephone: 703-603-8704 Last EDR Contact: 07/03/2019 Next Scheduled EDR Contact: 10/14/2019 Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 07/19/2019 Date Data Arrived at EDR: 07/30/2019 Date Made Active in Reports: 09/03/2019 Number of Days to Update: 35 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 09/05/2019 Next Scheduled EDR Contact: 10/28/2019 Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 07/19/2019 Date Data Arrived at EDR: 07/30/2019 Date Made Active in Reports: 09/03/2019 Number of Days to Update: 35 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 09/05/2019 Next Scheduled EDR Contact: 10/28/2019 Data Release Frequency: Quarterly

Federal RCRA CORRACTS facilities list

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 03/25/2019	Source: EPA
Date Data Arrived at EDR: 03/27/2019	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/25/2019 Date Data Arrived at EDR: 03/27/2019 Date Made Active in Reports: 04/17/2019 Number of Days to Update: 21 Source: Environmental Protection Agency Telephone: (888) 372-7341 Last EDR Contact: 09/16/2019 Next Scheduled EDR Contact: 10/07/2019 Data Release Frequency: Quarterly

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/25/2019 Date Data Arrived at EDR: 03/27/2019 Date Made Active in Reports: 04/17/2019 Number of Days to Update: 21 Source: Environmental Protection Agency Telephone: (888) 372-7341 Last EDR Contact: 09/16/2019 Next Scheduled EDR Contact: 10/07/2019 Data Release Frequency: Quarterly

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/25/2019 Date Data Arrived at EDR: 03/27/2019 Date Made Active in Reports: 04/17/2019 Number of Days to Update: 21 Source: Environmental Protection Agency Telephone: (888) 372-7341 Last EDR Contact: 09/16/2019 Next Scheduled EDR Contact: 10/07/2019 Data Release Frequency: Quarterly

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators) RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

SHWS: Inventory of Hazardous Disposal Sites

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

State and tribal Brownfields sites

BROWNFIELDS 2: Brownfields Inventory

A brownfield site is generally defined as "real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant or contaminanta?]"

Date of Government Version: 08/03/2017 Date Data Arrived at EDR: 09/20/2017 Date Made Active in Reports: 09/26/2017 Number of Days to Update: 6 Source: Department of Energy & Environmental Protection Telephone: 860-424-3705 Last EDR Contact: 06/21/2019 Next Scheduled EDR Contact: 09/30/2019 Data Release Frequency: Varies

BROWNFIELDS: Brownfields Inventory

CBRA has identified over 200 brownfield sites eligible for redevelopment. In most cases these are prime properties for commercial or industrial use. CBRA's grants, assistance and financing lower the financial risks and eliminate the legal, regulatory and environmental risks of redevelopment.

Date of Government Version: 03/25/2016 Date Data Arrived at EDR: 03/29/2016 Date Made Active in Reports: 05/18/2016 Number of Days to Update: 50 Source: Connecticut Brownfields Redevelopment Authority Telephone: 860-258-7833 Last EDR Contact: 09/16/2019 Next Scheduled EDR Contact: 12/30/2019 Data Release Frequency: Varies

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 06/03/2019 Date Data Arrived at EDR: 06/04/2019 Date Made Active in Reports: 08/26/2019 Number of Days to Update: 83 Source: Environmental Protection Agency Telephone: 202-566-2777 Last EDR Contact: 06/04/2019 Next Scheduled EDR Contact: 09/30/2019 Data Release Frequency: Semi-Annually

Local Lists of Landfill / Solid Waste Disposal Sites

	Data Release Frequency: Quarterly

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 03/25/2019 Date Data Arrived at EDR: 03/27/2019 Date Made Active in Reports: 04/17/2019 Number of Days to Update: 21 Source: Environmental Protection Agency Telephone: (888) 372-7341 Last EDR Contact: 09/16/2019 Next Scheduled EDR Contact: 10/07/2019 Data Release Frequency: Quarterly

FUDS: Formerly Used Defense Sites

The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.

Date of Government Version: 05/15/2019 Date Data Arrived at EDR: 05/21/2019 Date Made Active in Reports: 08/08/2019 Number of Days to Update: 79 Source: U.S. Army Corps of Engineers Telephone: 202-528-4285 Last EDR Contact: 08/23/2019 Next Scheduled EDR Contact: 12/02/2019 Data Release Frequency: Varies

DOD: Department of Defense Sites

This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

Date of Government Version: 12/31/2005 Date Data Arrived at EDR: 11/10/2006 Date Made Active in Reports: 01/11/2007 Number of Days to Update: 62 Source: USGS Telephone: 888-275-8747 Last EDR Contact: 07/09/2019 Next Scheduled EDR Contact: 10/21/2019 Data Release Frequency: Semi-Annually

FEDLAND: Federal and Indian Lands

Federally and Indian administrated lands of the United States. Lands included are administrated by: Army Corps of Engineers, Bureau of Reclamation, National Wild and Scenic River, National Wildlife Refuge, Public Domain Land, Wilderness, Wilderness Study Area, Wildlife Management Area, Bureau of Indian Affairs, Bureau of Land Management, Department of Justice, Forest Service, Fish and Wildlife Service, National Park Service.

US FIN ASSUR: Financial Assurance Information

All owners and operators of facilities that treat, store, or dispose of hazardous waste are required to provide proof that they will have sufficient funds to pay for the clean up, closure, and post-closure care of their facilities.

Date of Government Version: 03/25/2019 Date Data Arrived at EDR: 03/26/2019 Date Made Active in Reports: 05/07/2019 Number of Days to Update: 42 Source: Environmental Protection Agency Telephone: 202-566-1917 Last EDR Contact: 06/26/2019 Next Scheduled EDR Contact: 10/07/2019 Data Release Frequency: Quarterly

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013 Date Data Arrived at EDR: 03/21/2014 Date Made Active in Reports: 06/17/2014 Number of Days to Update: 88 Source: Environmental Protection Agency Telephone: 617-520-3000 Last EDR Contact: 08/05/2019 Next Scheduled EDR Contact: 11/18/2019 Data Release Frequency: Quarterly

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017 Date Data Arrived at EDR: 05/08/2018 Date Made Active in Reports: 07/20/2018 Number of Days to Update: 73 Source: Environmental Protection Agency Telephone: 703-308-4044 Last EDR Contact: 08/09/2019 Next Scheduled EDR Contact: 11/18/2019 Data Release Frequency: Varies

TSCA: Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2016 Date Data Arrived at EDR: 06/21/2017 Date Made Active in Reports: 01/05/2018 Number of Days to Update: 198 Source: EPA Telephone: 202-260-5521 Last EDR Contact: 06/18/2019 Next Scheduled EDR Contact: 09/30/2019 Data Release Frequency: Every 4 Years

TRIS: Toxic Chemical Release Inventory System

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 04/25/2019 Date Data Arrived at EDR: 05/02/2019 Date Made Active in Reports: 05/23/2019 Number of Days to Update: 21 Source: Environmental Protection Agency Telephone: 202-564-8600 Last EDR Contact: 07/22/2019 Next Scheduled EDR Contact: 11/04/2019 Data Release Frequency: Varies

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

INDIAN RESERV: Indian Reservations

This map layer portrays Indian administered lands of the United States that have any area equal to or greater than 640 acres.

Date of Government Version: 12/31/2014 Date Data Arrived at EDR: 07/14/2015 Date Made Active in Reports: 01/10/2017 Number of Days to Update: 546 Source: USGS Telephone: 202-208-3710 Last EDR Contact: 07/10/2019 Next Scheduled EDR Contact: 10/21/2019 Data Release Frequency: Semi-Annually

FUSRAP: Formerly Utilized Sites Remedial Action Program

DOE established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations.

Date of Government Version: 08/08/2017 Date Data Arrived at EDR: 09/11/2018 Date Made Active in Reports: 09/14/2018 Number of Days to Update: 3 Source: Department of Energy Telephone: 202-586-3559 Last EDR Contact: 07/30/2019 Next Scheduled EDR Contact: 11/18/2019 Data Release Frequency: Varies

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS) The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

Active Mines and Mineral Processing Plant operations for commodities monitored by the Minerals Information Team of the USGS.

Date of Government Version: 04/14/2011 Date Data Arrived at EDR: 06/08/2011 Date Made Active in Reports: 09/13/2011 Number of Days to Update: 97 Source: USGS Telephone: 703-648-7709 Last EDR Contact: 08/30/2019 Next Scheduled EDR Contact: 12/09/2019 Data Release Frequency: Varies

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

CPCS: Contaminated or Potentially Contaminated Sites

A list of Contaminated or Potentially Contaminated Sites within Connecticut. This list represents the "Hazardous Waste Facilities," as defined in Section 22a-134f of the Connecticut General Statutes (CGS). The list contains the following types of sites: Sites listed on the Inventory of Hazardous Waste Disposal Sites; Sites subject to the Property Transfer Act; Sites at which underground storage tanks are known to have leaked; Sites at which hazardous waste subject to the RCRA; Sites that are included in EPA's (CERCLIS); Sites that are the subject of an order issued by the Commissioner of DEP that requires investigation and remediation of a potential or known source of pollution; and Sites that have entered into one of the Department's Voluntary Remediation Programs.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

South Map:	5644938 NEW LONDON, CT
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- Groundwater flow direction, and
 Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ENE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:			
Search Radius:	1.25 miles		
Status:	Not found		

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID Not Reported LOCATION FROM TP GENERAL DIRECTION GROUNDWATER FLOW

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1	
Soil Component Name:	Udorthents
Soil Surface Texture:	loam
Hydrologic Group:	Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.
Soil Drainage Class:	Well drained
Hydric Status: Unknown	
Corrosion Potential - Uncoated Steel:	Moderate
Depth to Bedrock Min:	> 0 inches
Depth to Watertable Min:	> 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic	
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	conductivity micro m/sec	Soil Reaction (pH)
1	0 inches	5 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 703 Min: 0.01	Max: 7.8 Min: 4.5
2	5 inches	21 inches	gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 703 Min: 0.01	Max: 7.8 Min: 4.5
3	21 inches	79 inches	very gravelly sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 703 Min: 0.01	Max: 7.8 Min: 4.5

Soil Component Name:	Canton
Soil Surface Texture:	moderately decomposed plant material
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class:	Well drained
Hydric Status: Partially hydric	
Corrosion Potential - Uncoated Steel:	Moderate
Depth to Bedrock Min:	> 0 inches
Depth to Watertable Min:	> 0 inches

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA Telephone: 877-336-2627 Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Tidal Wetlands

Source: Department of Energy & Environmental Protection Telephone: 860-424-4054

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS) This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Community and Non-Community Water System Wells

Source: Department of Public Health, Water Supplies Section

Telephone: 860-509-7333

Active, emergency and inactive wells used for potable purposes that are owned and operated by active community and non-community water systems in Connecticut.

OTHER STATE DATABASE INFORMATION

Connecticut Leachate and Wastewater Discharge Sites

Source: Department of Environmental Protection

Telephone:

The Leachate and Waste Water Discharge Inventory Data Layer (LWDS) includes point locations digitized from Leachate and Wastewater Discharge Source maps compiled by the Connecticut DEP. These maps locate surface and groundwater discharges that (1) have received a waste water discharge permit from the state or (2) are historic and now defunct waste sites or (3) are locations of accidental spills, leaks, or discharges of a variety of liquid or solid wastes.

EPA-Approved Sole Source Aquifers in Connecticut

Source: EPA

Telephone:

Sole source aquifers are defined as an aquifer designated as the sole or principal source of drinking water for a given aquifer service area; that is, an aquifer which is needed to supply 50% or more of the drinking water for the area and for which there are no reasonable alternative sources should the aquifer become contaminated.

RADON

State Database: CT Radon Source: Department of Public Health Telephone: 860-509-7367 Radon Statistical Summary

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency

(USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones Source: EPA Telephone: 703-356-4020 Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater Source: Department of Commerce, National Oceanic and Atmospheric Administration

Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary faultlines, prepared in 1975 by the United State Geological Survey

AAI – USER QUESTIONNAIRE

FOR

Pleasant Valley School-380 Pleasant Valley Rd S, Groton, Connecticut

In order to receive CERCLA liability protection, the $user^{l}$ must provide the following information (if available). Failure to provide this information could result in the determination that "all appropriate inquiry" was not complete.

1. Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).

Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state, or local law?

2. Activity and land use limitations (AULs) that are in place on the site or that have been filed or recorded in a registry (40 CRF 312.26).

Are you aware of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?

o Yes o No 🏹 Unknown

3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).

As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

o Yes

No No

o Unknown

¹ The party seeking to complete an AAI to receive CERCLA liability protection

4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).

Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

o Yes o No 🗙 Unknown

5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user, (a.) Do you know the past uses of the property? (b.) Do you know of specific chemicals that are present or once were present at the property? (c.) Do you know of any spills or other chemical releases that have taken place at the property? (d.) Do you know of any environmental cleanups that have taken place at the property?

o Yes o No 🗙 Unknown

6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence of likely presence of contamination at the property?

Yes 0 o No 🛇 Unknown
