

# Sophisticated, multi-faceted, innovative, connected!

## Industry stats

**11,000**

jobs in manufacturing

**25%**

growth since 2010  
2,200 total jobs added

**\$117,000**

average earnings

## Major sub-sectors jobs

**9,800**

Ship and boat building

**560**

Pharmaceutical and medicine  
manufacturing

**370**

Ferrous metal foundries

Thanks to a strong regional ecosystem and access to a highly-educated and skilled workforce, manufacturers play a vital role in driving Groton's economy.

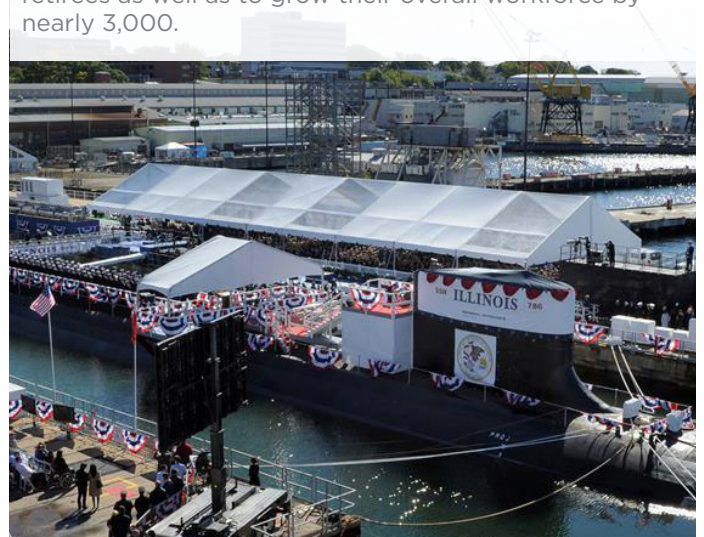

"In the past year, LBI has moved close to a half million pounds of steel for the Navy. Having the deep water port available to us is huge"

- Peter Legnos, President, LBI

**Electric Boat:** Due to demand for new and replacement submarines, General Dynamics Electric Boat expects to hire up to 15,000 people through 2030, both to replace retirees as well as to grow their overall workforce by nearly 3,000.

**Groton is famous for building submarines, but did you know we also make beer, dry-water spas, and double basses?**

In addition to our large, nationally-recognized manufacturing companies, Groton is home to dozens of small and medium-sized manufacturers producing many different products, including:

**Outer Light Brewing Company**, a microbrewer founded in 2015 with a beer selection that is a mix of some favorite standards as well as an innovative rotation of flavors, available at their tap room as well as retail distributors.

**The Mystic Cheese Company** is a one-of-a-kind collective of skilled cheese professionals blending science, art, and craftsmanship into a unique artisanal product line.

**ThayerMahan** delivers unmanned watercraft deployable for real-time data collection to protect the world's maritime food supplies, trade routes, industrial infrastructure and borders.

**LBI** provides full-circle development of autonomous systems for marine deployment, including buoys and unmanned surface and underwater craft.
